

# MANUAL OF GOOD PRACTICES FOR COMPANIES

Companies in the Val d'Aran are responsible for reducing the negative impacts of their activities

## 1. Collaborate

in the conservation of biodiversity and the creation of experiences that do not have a negative effect on the environment.

## 2. Looking after, ing and appreciating

the valley as your home is the responsibility of all.

## 3. Respect

and place value on local traditions. History, legends and events identified with the Val d'Aran.

## 4. Raise

visitors' awareness. Raise awareness and transmit to travellers the experiences, values and respect for the natural and cultural environment.

## 5. Advocate

for the dissemination of the local natural and cultural heritage. Disseminate: a professional duty. Publicise: a social duty.

## 6. Consume

local products. Raise awareness of the territory's local products, their values and attributes. Place value on the cuisine of the valley.

## 7. Encourage local production and establish

synergies and collaborations between the companies of the region.

## 8. Cooperate

to work as a network. Support the economic and social development of the local community. Guarantee a respectful and collaborative attitude through institutions, NGOs, neighbourhood groups, companies, etc.

And contributing to increasing their profits while respecting the environment

## 9. Promote

local employment by hiring local professionals and guaranteeing decent working conditions.

## 10. Train

team members on sustainability in relation to the activities they carry out in their jobs.

## 11. Support

staff from employment centres or entities with a high social value and with a commitment to the labour. Insertion of people with functional diversity.

## 12. Guarantee

basic accessibility conditions and the inclusion of people with reduced mobility to access and use the facilities.

## 13. Establish

policies for recycling and use of natural resources.

## 14. Deal with waste responsibly

reduce, reuse and recycle.

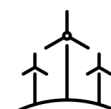

## 15. Reduce

paper usage. Experiences do not need printed documentation.

## 16. Reduce

plastic consumption. No use of single-use plastics.

## 17. Use

renewable energy and support energy saving.
